

1. Brand Identity, Typography & Design Tokens

DESIGN SYSTEM

Monument Extended

**Display & Headlines.** Locally hosted in `public/fonts/`. Used for impactful hero mastheads, section titles, and portal signage.

IBM Plex Sans

**Body & Editorial.** High-legibility technical humanist typography for case study narratives, paragraphs, and descriptions.

IBM Plex Mono

**Telemetry & Logic.** Used across live metric counters, pricing engines, timestamps, SLA pills, and table data.

Abyss #0F1B2A

Deep oceanic black serving as the public showcase foundation.

TVL Amber #F4C05D

Primary golden amber accent, active sprint badges, and glow.

TVL Plum #2E1F27

Studio brand dark accent for secondary buttons and tags.

Seaglass #E0E1DC

Clean high-contrast cream white for crisp body copy.

**Studio Core Positioning:** "Where brand, technology, and content move together." Four disciplines, one coordinated pod. Structured for async global execution from **Manila** → **Worldwide** across US, UK, AU, and CA business hours.

2. Public Agency Showcase (/) — Features & Flow

ACQUISITION ENGINE

| SECTION                  | KEY ELEMENTS                      | CAPABILITIES & INTERACTIVE FUNCTIONS                                                                                                                                                                                          |
|--------------------------|-----------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Sticky Header            | Logo, Nav Links, CTAs             | Anchor scrolling to <code>#work</code> , <code>#services</code> , <code>#process</code> . Features the <code>PORTAL ACCESS</code> shortcut and <code>Build your brief</code> trigger.                                         |
| Hero Masthead            | Monument Headline, Glow Banner    | Signature yellow cropped <code>VIRTUS // ONE TEAM</code> brand art with golden ambient glow. Real-time availability pulse beacon (Q2/Q3 Projects).                                                                            |
| Spatial 3D Work          | Tidewater, Northstar, Aster       | Interactive 3D spatial depth cards with multi-plane parallax tilt. Labeled concept explorations vs live production client handoffs.                                                                                           |
| 4 Disciplines            | Brand, Web, Content, Growth       | Detailed outcome-oriented capability breakdowns detailing deliverables from visual identity to Next.js platforms and video frameworks.                                                                                        |
| Engagement Tiers         | Focused, Growth, Integrated       | Direct interactive triggers. Clicking <b>"Select Focused"</b> (\$1.8k-\$3.2k), <b>"Select Growth"</b> (\$4.2k-\$7.5k), or <b>"Select Integrated"</b> (\$8.5k-\$14k) automatically opens and pre-configures the brief builder. |
| Brief & Quotation Engine | 4-Step Brief + Realtime Quotation | Calculates live investment range, turnaround weeks, custom deliverable list, and a <b>3-stage milestone breakdown</b> (50% Kickoff, 25% Midway, 25% Final Handoff). Persists directly into <b>Neon Cloud DB</b> .             |
| Straightened Footer      | 4 Columns + Spread Brand Tier     | Top straight grid ( <code>EXPLORE</code> , <code>STUDIO</code> , <code>WORKSPACES</code> , <code>CONNECT</code> ). Lower tier spreads large logo wordmark, mission statement, status, and worldwide coordinates.              |

# WORKSPACE PORTAL & COMMAND DESK

ROLE-BASED ACCESS CONTROL (/portal) & ADMIN OPERATIONS (/admin)

RBAC Mode: Multi-Tenant Scoped

Modules: 15 Full-Stack

## 3. Workspace Portal Gateway (/portal)

ACCESS CONTROL

### 1. Admin Door (/admin)

For Founders & Pod Leads. Unlocks all 15 operational sectors, client pipelines, accounting ledgers, proposals, and Neon cloud database migrations.

### 2. Team Door (/team)

For Studio Pod Members (Kai, Ren, Sora). Scoped strictly to sprint Kanban boards, assigned projects, velocity meters, and creative assets.

### 3. Client Door (/client)

For Client Stakeholders. Private white-glove room with milestone roadmap, deliverable review, interactive revision request desk, and invoices.

## 4. Operations Command Desk (/admin) — 15 Modules

FULL OPERATIONS OS

| MODULE                                                                                             | COMPONENT             | OPERATIONAL SCOPE & FUNCTIONALITY                                                                                                                                |
|----------------------------------------------------------------------------------------------------|-----------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  Overview         | CommandCenterOverview | 4 Live Neon KPI metrics (Pipeline Value, Open Leads, Active Projects, Collected Revenue), active sprint pulse progress bars, and recent activity feed.           |
|  Leads (Pipeline) | PipelineView          | 6-stage opportunities Kanban (New Inquiry → Won). Dragging an opportunity to Won automatically spins up active client and project records.                       |
|  Clients          | ClientsView           | CRM client directory tracking company profiles, lifetime value (LTV), active status badges (Active, Onboarding, Completed), and "+ Add Client" modal.            |
|  Bookings         | BookingsView          | Interactive Cal.com/FullCalendar grid, 4 booking link cards, day agenda drawer, and "+ Schedule Meeting" modal with automated Google Meet link generation.       |
|  Proposals        | ProposalsView         | SOW scope generator, fee calculations, proposal statuses (Draft, Sent, Accepted), and interactive full-page Statement of Work preview modal.                     |
|  Contracts      | ContractsView         | Legal agreements vault (MSA, SOW, mutual NDAs) with an <b>interactive digital e-signature pad</b> and timestamped audit logs compliant with ESIGN/UETA.          |
|  Projects       | ProjectsTasksView     | Active client project health cards tracking 5-phase milestones (Discover → Support), allocated budget, and target delivery dates.                                |
|  Team Tasks     | ProjectsTasksView     | Delivery floor Kanban task board (To Do, In Progress, QA, Completed) with assignee filters for Kai, Ren, and Sora.                                               |
|  Accounting     | AccountingView        | Master agency financial ledger, accounts receivable tracking, Stripe Connect payout monitoring, and invoice management (Paid, Pending, Overdue).                 |
|  Library        | MediaLibraryView      | Cloudflare R2 object vault with General Library and Client Work folders, featuring in-browser previews for PDFs, images, and audio/video files.                  |
|  Business Email | BusinessEmailView     | Split-pane studio communication client with mailboxes (Inbox, Brief Inquiries, Sent), message thread previews, and "+ Compose Email" modal.                      |
|  Reports        | ReportsView           | Studio intelligence: Pipeline conversion rate (67%), on-time sprint velocity (94.2%), average deal size, and gross margins by discipline (88% Brand, 82% Web).   |
|  Users & Roles  | UsersRolesView        | Team roster, assigned project counts, online activity indicators, and role permissions matrix (Owner, Pod Lead, Specialist, Client Guest).                       |
|  Security & DB  | SecurityAuditView     | Security score (96/100 Grade A), API key vault, immutable audit trail, and <b>interactive Neon PostgreSQL cloud database diagnostic &amp; migration runner</b> . |
|  Settings       | WorkspaceSettingsView | Studio profile, custom domain (portal.thevirtuslabs.com), currency, studio timezone (UTC+8), and Cal.com / Stripe webhook endpoints.                             |

# CLIENT ROOM & ENGINEERING ARCHITECTURE

WHITE-GLOVE PORTAL (/CLIENT), TEAM FLOOR (/TEAM) & INFRASTRUCTURE

Deployment: Vercel Edge Global  
Database: Neon PostgreSQL  
Serverless

## 5. Team Sprint Floor (/team)

DELIVERY POD

Distraction-free workspace tailored for Kai (Brand Architect), Ren (Lead Engineer), and Sora (Content Director). Provides live Kanban boards, sprint burndown metrics (94.2% on-time rate), and downloadable brand assets.

## 6. Private Client Room (/client) & Revision Feedback Desk

WHITE-GLOVE EXPERIENCE

### 5-Phase Milestone Journey

Interactive progress tracker across **Discover** → **Design** → **Build** → **Deliver** → **Support** with milestone completion percentages, budgets, and target handoff dates.

### Deliverable Review & Approval

Displays staging preview screenshots with live staging URLs. Clients can click **"Approve Deliverable"** for formal sign-off or open the revision desk.

### 🌟 The New Interactive Sprint Revision Request Form & Live Ticket Tracker

Replaced basic browser alerts with a dedicated, comprehensive **Sprint Feedback Desk Modal Form**:

- Review Scope Banner:** Displays staging preview link and scope allowance ("Round 1 of 2 Included").
- Multi-Select Discipline Chips:** Visual & UI, Copy & Typography, Functionality, Mobile Viewports, Brand Assets.
- Target Element Dropdown:** Hero & Navigation, Product Grid, Typography & Colors, Checkout, Global.
- Urgency Cards:** Routine (Polish), Important (Triage), or Critical Blocker (Launch-affecting).
- Structured 6-Row Textarea:** Guidance for clear, numbered, actionable points.
- Reference Links & Uploads:** Input for Figma/Loom URLs + multi-file attachment chips with remove controls.
- Live Revision Ticket (#REV-2026-XXX):** Transforms the deliverable card into an active tracking ticket displaying assigned Pod Leads (Paks & Kai), a 24–48h SLA response window, and action controls to edit or withdraw.

## 7. Technical Architecture, Cloud Database & Security

PRODUCTION READY

### Next.js 15 App Router

React 19 Server Components, dynamic streaming, and serverless API route handlers deployed globally to Vercel Edge.

### Neon Serverless Cloud DB

PostgreSQL cluster in Singapore (sub-180ms latency) using `@neondatabase/serverless` connection pooling and dual-write memory resilience.

### Edge Security Middleware

Strict HSTS, nosniff, SAMEORIGIN, and permissions policies enforced across all public and internal workspace routes.

## 8. Master Navigation & Route Directory

LINKS

| DESTINATION            | URL PATH    | AUDIENCE / PURPOSE                                                     |
|------------------------|-------------|------------------------------------------------------------------------|
| Public Showcase        | /           | Marketing flagship, spatial 3D work showcase, and studio disciplines.  |
| Brief Builder          | /#brief     | Interactive quotation engine with 3-stage milestone pricing.           |
| Workspace Portal       | /portal     | Doorway selector implementing RBAC access for Admin, Team, and Client. |
| Command Desk           | /admin      | Internal agency operations OS (all 15 workspace & management modules). |
| Team Sprint Floor      | /team       | Scoped sprint task board and creative asset library.                   |
| Client Room            | /client     | Client staging review, revision request desk, and billing records.     |
| Health & Latency Probe | /api/health | Observability probe returning system uptime and Neon DB latency.       |
